

## Webtech assignment 2- bootstrap and java script

The screenshot shows the 'ABOUT US' section of the website. The background is green. At the top, there is a header with the text 'Angel Tree Donations'. Below the header, the main content area has a dark green background with white text. The text describes the mission of Angel Tree Donations, emphasizing the magic of kindness and the joy of giving, particularly during the holiday season. It highlights the organization's goal of bringing smiles to children and providing essential items to families facing tough times. The text also mentions the community support and the impact of every donation, big or small. It concludes by stating that every child deserves a joyful holiday filled with excitement and love, and encourages users to join in spreading the spirit of giving.

## ABOUT US

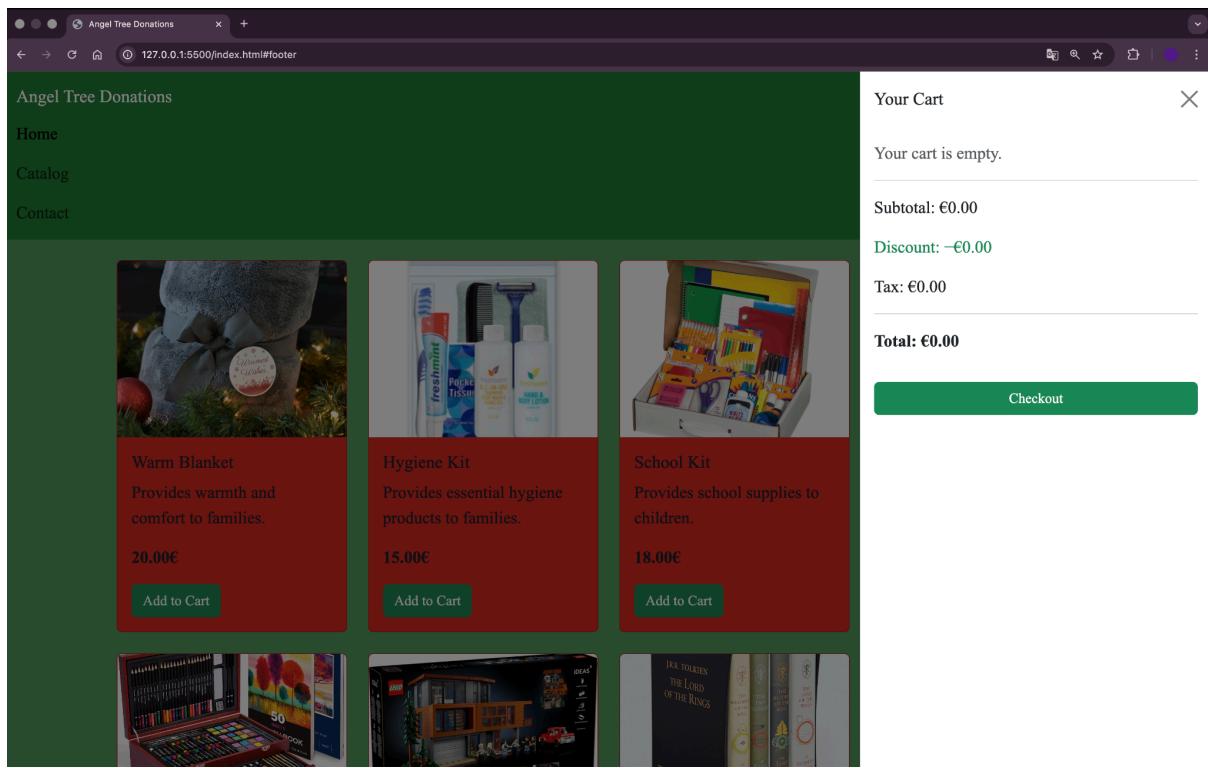

At Angel tree Donations, we believe in the magic of kindness and the joy that comes from giving. We are a non-profit organisation dedicated to helping families in need, especially during the holiday season, a time meant for warmth, love and celebration. Our mission is simple: to bring smiles to children's faces and hope to families who may be facing tough times. Through generous donations and the support of our amazing community, we provide essential items, thoughtfull gifts, and heartfelt support to those who need it most. Every donation, big or small, helps create moments of happiness and reminds families that they're cared for. WE believe every child deserves a joyful holiday filled with excitement and love. That's why we work hand in hand with donors, volunteers, and community partners to make each contribution count. Join us in spreading the spirit of giving and making a difference in the lives of others. Together, we can create a world where every child feels cherished and every family experiences the true meaning of the holiday season!!

## PRODUCT CATALOG

This should be the first thing someone opens the website; I wanted to make it christmas themed lowkey, with the green background and red cards but it might be too much...

The screenshot shows the 'PRODUCT CATALOG' section of the website. The background is green. At the top, there is a header with the text 'Angel Tree Donations'. Below the header, there is a navigation menu with links to 'Home', 'Catalog', and 'Contact'. The main content area features a grid of products. There are four products displayed in a row: 'Warm Blanket' (Provides warmth and comfort to families. Price: 20.00€), 'Hygiene Kit' (Provides essential hygiene products to families. Price: 15.00€), 'School Kit' (Provides school supplies to children. Price: 18.00€), and 'Scarf and gloves' (Provides warmth and comfort to families. Price: 10.00€). Each product has a small image, a title, a description, a price, and a 'Add to Cart' button. Below this row, there are two more rows of products: a row with a 'Coloring Set' and a 'LEGO House' (IDEAS), and a row with a 'Book Set' and a 'Diaper Bag'.

how the nav looks like + part of the catalog. when clicking on the navigation it scrolls directly to each section, even if there's not much to them tbh

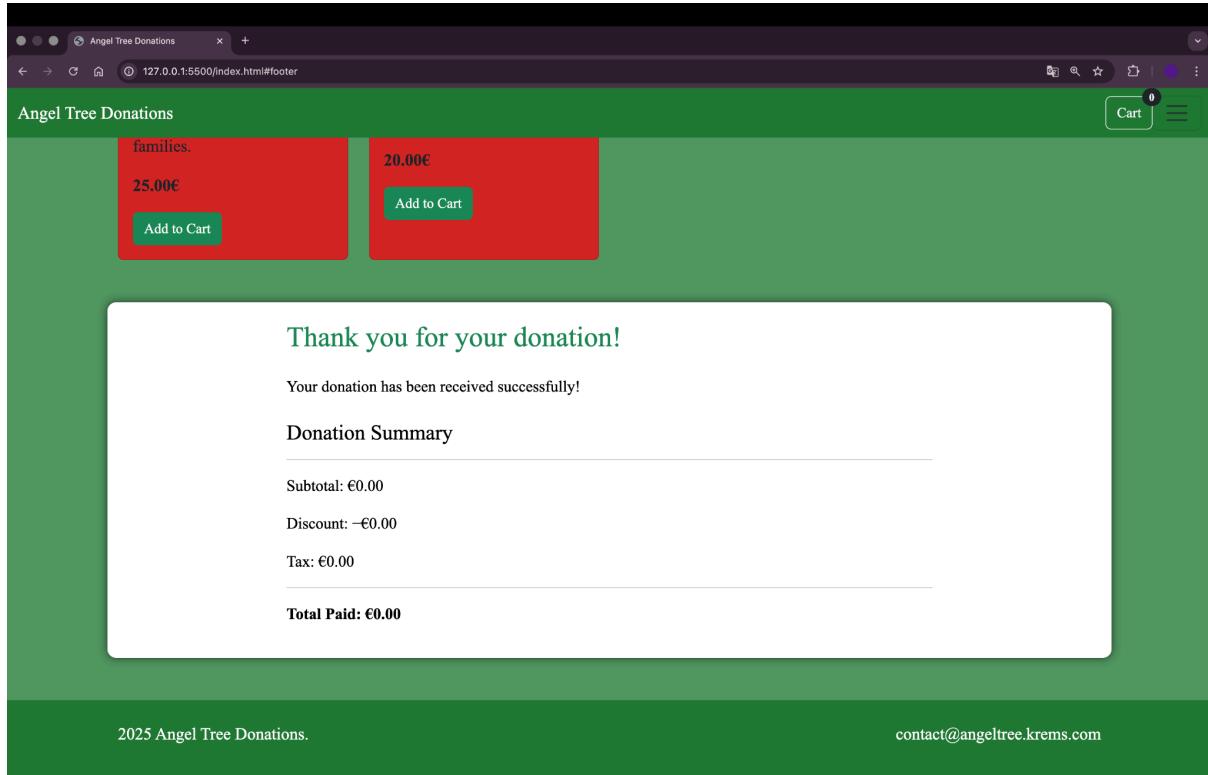

how the cart should look like- i used the off canvas resources from the bootstrap website.  
when someone clicks the checkout, the section should appear under the catalog.

The screenshot shows a checkout form for 'Angel Tree Donations'. The header includes a 'Cart' icon with a '0' notification. The form fields are as follows:

- First name: Input field
- Last name: Input field
- Email: Input field containing 'you@example.com'
- Address: Input field
- Country: Input field containing 'Austria'
- State: Input field containing 'Tirol'
- Zip: Input field containing '6010'
- Shipping address is the same as my billing address:
- Save this information for next time:
- Payment method selection: Two radio buttons: 'Credit card' (selected) and 'Debit card'.
- Name on card: Input field
- Credit card number: Input field
- Full name as displayed on card: Input field

this is how it should look like, the only requirement i have is for the email having to include the @ .

this is what should show up after confirming the previous section.

I used the bootstrap website, the w3school tutorials for certain explanations and a youtube tutorial video about javascript, but that was general not specifically about something similar to the assignment.

i had an issue with the page reloading to the last section recorded (for example if i click on contact from the nav it brings me to the footer so it stays on the footer if i refresh) and i could only figure it out after asking chatgpt so i didnt want to include that

```
if (window.location.hash) {  
    history.replaceState(null, "", window.location.pathname);  
}
```
